

CONTRACTOR REQUIRED FOR LOCAL

ENGINEERING FIRM – flexible hours

- We are looking for someone not afraid of hard, physical work.
- Full training provided
- You must be physically fit
- Would suit semi-retired person or as a second job as it is a zero hours contract

We are a rapidly expanding company operating within the power generation industry. We are based at Loseley Park, Compton. Our core activity is the cleaning of power station boilers using patented technology that creates controlled gas detonations. The detonating gas sets up a pressure wave that cleans the internal boiler surfaces and keeps the boiler running efficiently.

You would be required to attend site, set up the equipment and carry out the clean as instructed by the Team Leader. The hours can be unsociable and sometimes involve weekends and overnight stays. Our work sites are scattered across the UK and Ireland, however we offer good rates of pay and cover all expenses.

We are an equal opportunities employer.

If this is of interest to you, please contact. George Pawson on 01483 570044
